

JOB POSTING-Western Michigan Region:

FIRE CATT is a growing Michigan based company. We provide Critical Asset Testing and Tracking services to Fire Departments specializing in FIRE HOSE TESTING, TRACKING, and REPORTING. FIRE CATT has engineered electronic computerized and SAFE hydrostatic testing technology. We are looking for many persons to fill this part time position in the Western Michigan Region.

Job Opening: Part Time Hose Testing Technicians-West Michigan

We are looking to hire up to 15 part-time Technicians with the following skills and expertise:

- Experienced in the NFPA hose testing requirement
- Ability to properly execute the unloading and loading of apparatus hose.
- The ability to communicate professionally with Fire Departments personnel.
- Willingness to travel to any Fire Department within the Western Michigan region.
- The ability to execute and perfect standard operating procedures.
- The ability to participate with a team of up to 10 operations technicians executing the testing procedure.
- Willingness to work part-time for \$10/hour + mileage. An excellent way to supplement your primary income.
- Desire and passion to want to be a part of something new while making a difference.
